

SERVICES PROVIDED:

- ❖ Shotcrete Shoring
- ❖ Anchor Drilling
- ❖ IBO Hollow Bar Injection Drilling
- ❖ Underpinning
- ❖ Micropiling
- ❖ Solider & Secant Piling
- ❖ Pipe Pile Installation
- ❖ Shotcrete (Dry & Wet)
- ❖ Slope Protection
- ❖ Concrete Rehabilitation
- ❖ Skilled Labor Services

EQUIPMENT:

- ❖ Excavator Mounted Drills
- ❖ Hydraulic Crawler Drills
- ❖ Piling Drills
- ❖ Shotcrete Pumps (Wet & Dry)
- ❖ Grout Pumps
- ❖ Air Compressors
- ❖ Rock (Air Drills)
- ❖ Word Rock Drills
- ❖ Man / Heli Portable Equipment
- ❖ Hydraulic Testing Equipment
- ❖ Confined Space Specialty Equipment

KEY DIFFERENTIATORS:

- ❖ 60 Hour (6 day) Work Weeks
- ❖ Professional Site Staff
- ❖ Extensive Work Experience
- ❖ In House Engineering
- ❖ Modern Equipment
- ❖ Attention To Detail & Quality
- ❖ High Safety Standards

COMPANY PROFILE

Integrity Shoring & Civil is a leading shoring and civil construction company dedicated to professionalism, quality and safety. Our commitment to excellence in implementing shoring solutions ensures each job is tailored to the unique needs of the project.

Our experienced teams collaborate closely with clients to deliver a diverse range of high-quality shoring systems, from standard shotcrete and anchors to complex structural support while always adhering to the industry, engineering and safety standards.

Integrity Shoring & Civil is a trusted partner for those seeking reliable and customized shoring solutions that prioritize Integrity.

MANAGEMENT TEAM

Nick Baldwin - President

Nick has over 20 years of experience as a shoring contractor and has experience in shotcrete shoring, secant shoring, deep foundations and micropile installation. His leadership and project management skills keep Integrity Shoring & Civil Ltd. a preferred contractor in the business and by clients. Nick continues to be involved in all aspects of the business, offering his experience and skills to clients, engineers and our Integrity team.

Scott Robbins, MBA, Peng – Senior Project Manager

Scott has over 10 years' experience as a consulting engineer with over 8 years as group manager at GeoPacific Consultants designing and managing temporary and permanent shoring projects. He brings his knowledge as an engineer to Integrity Shoring & Civil, allowing for strong working relationships with the design engineer and owner on all projects. His design experience includes, shotcrete shoring, H-pile and timber lagging, secant shoring, sheet pile shoring and deep foundation design.

FEATURE PROJECTS

Park and Maven

Integrity was awarded the Park and Maven temporary shotcrete shoring wall with the assigned target of installing 26,000 ft² of shotcrete and over 985 anchors in 50 days. Integrity developed a work plan to expediate the schedule and successfully completed the scope in 47 working days.

Parkland Refinery

Integrity was contracted to perform a challenging shotcrete scope at the Parkland Refinery which required shotcrete installation from a man-basket in a live plant. Integrity worked closely to develop a plan with the Owner and all stake holders to ensure there were no impacts to the daily operations of the refinery. The work was completed successfully and safely.

Davie Street Mixed Use

Integrity installed a 12,500 ft² temporary shotcrete shoring wall including pipe piles, underpinning of an adjacent structure and rock anchors in Vancouver, BC. Worked within a small footprint with the excavator mounted drill to limit benching and platform requirements needed for anchor installation to allow excavation contractor to continue working.

AbbeyWrap

Integrity installed a permanent shotcrete shoring wall to allow for the expansion of the AbbeyWrap warehouse in Abbotsford, BC. Worked with the owner and design engineer to install permanent shotcrete wall while removing an existing lock block wall in a safe but efficient sequence.
